# Great Cut [Extra Quality] Crack

The only problem, at least so far, with the Chinese carpet cutter is that it just cracked in one spot after the first use. I called the manufacturer, and they told me that I was using the wrong model (the Chinese went for a rail rather than a balustrade, etc). I'm taking it back tomorrow, and I'll see if they can fix it. They have a line of fence cutters for sale, so I'll probably buy the cheapest one available. I'm excited to get this Chinese carpet cutter to try out, and I hope it works well. Some other suggestions for working with the Chinese carpet cutter, from the comments on the Chinese site include: i) Just cut it into the ground and plant some local fruit trees. You can then water them using it. ii) Clear the ground and then plant some herbs for medicinal purposes. iii) Also plant some artificial flowers in clay pots to brighten up the place. For your old man, spray paint it red, and put a battery operated MP3 player underneath it. Best of luck. Anyways, I got a cheap Chinese carpet cutter that I bought from ebay for about \$40 or so. The problem I had was that the first time I used it, it broke. It just cracked and doesn't cut anymore. Hopefully someone can suggest some solutions. A: From the site you linked to: [...]do not use the machine to cut concrete, asphalt, brick, stone and other materials that can be sawed. and in another part of the same page Cutting knives usually have a guard that goes over the blade. The guard prevents hands and fingers from getting cut. Please see the picture below. ...suggests that the cutter has no guard at all, so that probably means it has no guard for the cutting blade, which is dangerous. I'm worried that you damaged it when you wanted to give it a try, because if it is possible to cut concrete, asphalt, etc. with it, you shouldn't have to spend so much time and effort to figure out how to get it working. You're really lucky that you got a crack on the cutting blade. If I were you, I wouldn't try to fix it and instead would get a replacement cutter (if they have it, it seems they don't have it in the US, but are shipping from China, so I don't know.) A:
