FIFA is a football (soccer) video game series created by EA Canada and published by EA Sports. It was first released in September of 1994. FIFA's formula is often referred to as the "Play, Train, and Communicate" model, but it has been reworked from version to version as its gameplay and features have evolved over time. With the FIFA series, you can create or import a team of real world players, manage a club from youth to the first team, control how your team plays, play through in a season-long simulation, and even compete in real-life tournament events with your team or against the computer. As a football manager, FIFA's goal is to provide you with a way to create your own team, and to provide an in-depth game experience that allows you to follow the highs and lows of your career as you lead your club to victory. The FIFA series has come a long way since its first iteration, and today it includes five generations of gameplay.

FIFA: The Career Game FIFA: The Career Game FIFA offers some of the richest career options available in a football game. Using the features of the new Career Mode, you can create a player and manage them from youth ranks to the premier league, and even play in high-profile international tournaments. The new features and content added to the Career Mode offer a rich and captivating experience, with the ability to follow the highs and lows of a career. Over time, you will gain the ability to create players with real world ability, build your reputation as a manager, compete in some of the world's most prestigious sports events, and produce your own player in training. FIFA's Classic Career Mode lets you begin with clubs based on real-life formations, squad formations, player jobs, training facilities, playing style and contracts. You can manage a club from the youth system through to the real-world equivalent of the Premier League, World Cup, European Championships and other international competitions, and compete in real-life competitions such as the UEFA Champions League, UEFA Europa League, FIFA Club World Cup and the FIFA Club World Cup. FIFA Ultimate Team FIFA Ultimate Team integrates Ultimate Team into the Career Mode, giving you the chance to build and manage your own team from within the same game. This allows you to have fun with your teammates and attempt to unlock and collect the players you want. New and experienced bc9d6d6daa

Q: When is  $V(a_1) \subset V(a_2)$  equivalent to  $V(a_1) \supset V(a_2)$ ? As the title says, when does  $V(a_1) \subset V(a_2)$  imply  $V(a_1) \supset V(a_2)$ ? To my understanding, it does so if both  $a_1, a_2$  are local irreducible and  $\dim(V(a_2) \setminus V(a_1)) \leq 1$ . Is this right? A: In your sentence, the conclusion doesn't really follow from the premise as written, but you are absolutely right about the crucial conditions you mention. That said, the conclusion holds for  $\mathbb{C}$  and  $\mathbb{C}^*$  whenever you're working over  $\mathbb{C}$ . For example, in the second case,  $V(a_2) \setminus V(a_1)$  will be  $\{0\}$  which
