**What's new in Fifa 22:**

- FIFA 22 introduces “HyperMotion” Technology, which will show 22 Pro players as they play FIFA 22 live in motion. The upper torso and whole body are tracked throughout the match, just like in a real-life football match. The highlight's are a series of tutorials to help you use the different gameplay features. Everyone playing in motion will get new animations, goal celebrations, goalkeeping effects, goal celebrations and corner kicks.
- FIFA 22 introduces the ability to predict both free kicks and penalties. Goalkeepers no longer need to be in the goal area and the defender in position at the time of an infraction must (in most cases) have his back to the goal. Furthermore, in FIFA 22, a penalty will always be awarded to the home team and goalies will no longer save penalties.
- There will be a new penalty Kickzone, which will determine whether a penalty kick is taken from the centre or a side post. The Kickzone is also used to provide the option to reset a loose ball during play.
- FIFA 22 will receive new camera modes. The cutscenes are now fully dynamic, with smooth-transition scenes and much improved on-the-fly camera angles. Graphics effects are also more vibrant and the PC version supports up to 4x AntiAliasing.
- FIFA 22 continues to receive regular updates following public feedback gathered from communities and the clubs' forums. A new training mode and trainer editor, closer Examination Inspector, and a Gamewell feature to improve player skills are all available in FIFA 22.
