Filmora is a video editing app for people who need to publish video on the Internet. It's just what you want if you're thinking of making home videos, sharing videos on the Internet with friends and family, or even producing video-on-demand. You can't say the same for Apple iMovie or Adobe Premiere Elements. Filmora enables you to edit videos up to 4 GBs on your Mac or PC with the 4 GB limit in Windows included. If you want more, you can upgrade to Wondershare Filmora 10, for \$29.99. Existing Filmora owners can upgrade for \$9.99. But when you exceed the 4 GB limit, you'll have to upgrade. It can help you retouch videos, add stylish titles, apply filter effects, change video formats and even burn videos to DVD discs. These are all great video editing features, but wonder why does it cost \$49.99? It's because it's a video editor, not a video creator. Filmora works with over 300 popular video formats, including MP4, MOV, MKV, MTS, AVI, MP3, FLV, H.264, H.265 and WMV. Many of the videos from popular video sharing sites

such as Google Plus, Facebook, Vimeo and Dailymotion can be exported.

Filmora's Music section includes 172 background music tracks. By default, it will automatically choose the best available file formats for videos on the computer. However, you can always choose a specific format to save your videos.
