When I attempt to login, the session times out. I am running the following code which is based off of a solution that I found from another SO post, which, by the way, works in C#, but not python. I have also tried running it with an explicit sleep statement, but still no luck. Here's my python code: from selenium import webdriver from selenium.webdriver.common.by import By from selenium.webdriver.support.ui import WebDriverWait from selenium.webdriver.support import expected\_conditions as EC import time my\_driver = webdriver.Firefox() my\_driver.get("") my\_login = By.name("Login") my\_login.send\_keys("XXXXX") my\_password = By.name("Password") my\_password.send\_keys("XXXXX") my\_submit = By.name("loginButton") my\_submit.click() A: If you are talking about localhost, then you need to set up the Timeout settings of the browser to be able to cope with these situations. Go to chrome://flags/#disable-infobars Disable the infobars Relaunch chrome Now you should be able to send the login and password without the timeout error happening. Well, I'm not a beautiful woman. I'm not wealthy or famous. I don't have a wide set of shoulders. But I do have a deep love of God, and He loves me. Maybe that's enough. About Me I'm a preacher's wife, but my biggest job description is mother. I've been married to Don for almost 25 years, and we have
